

- ★ Social chess model: (Homo sapiens = Eusocial animal) (12)
 (herd → co-op equilibrium)
 ★ every family is a army group

↳ each family must have at least

1 Pam-HSP & 1 Pam-NP the brother of "ramman"
 sentry warrior is a Pam-NP 000

★ sum of family members = 0 → to co-op
 (observer syndrome + fighter syndrome = 0)
 ⊕ ⊖ ★ co-op

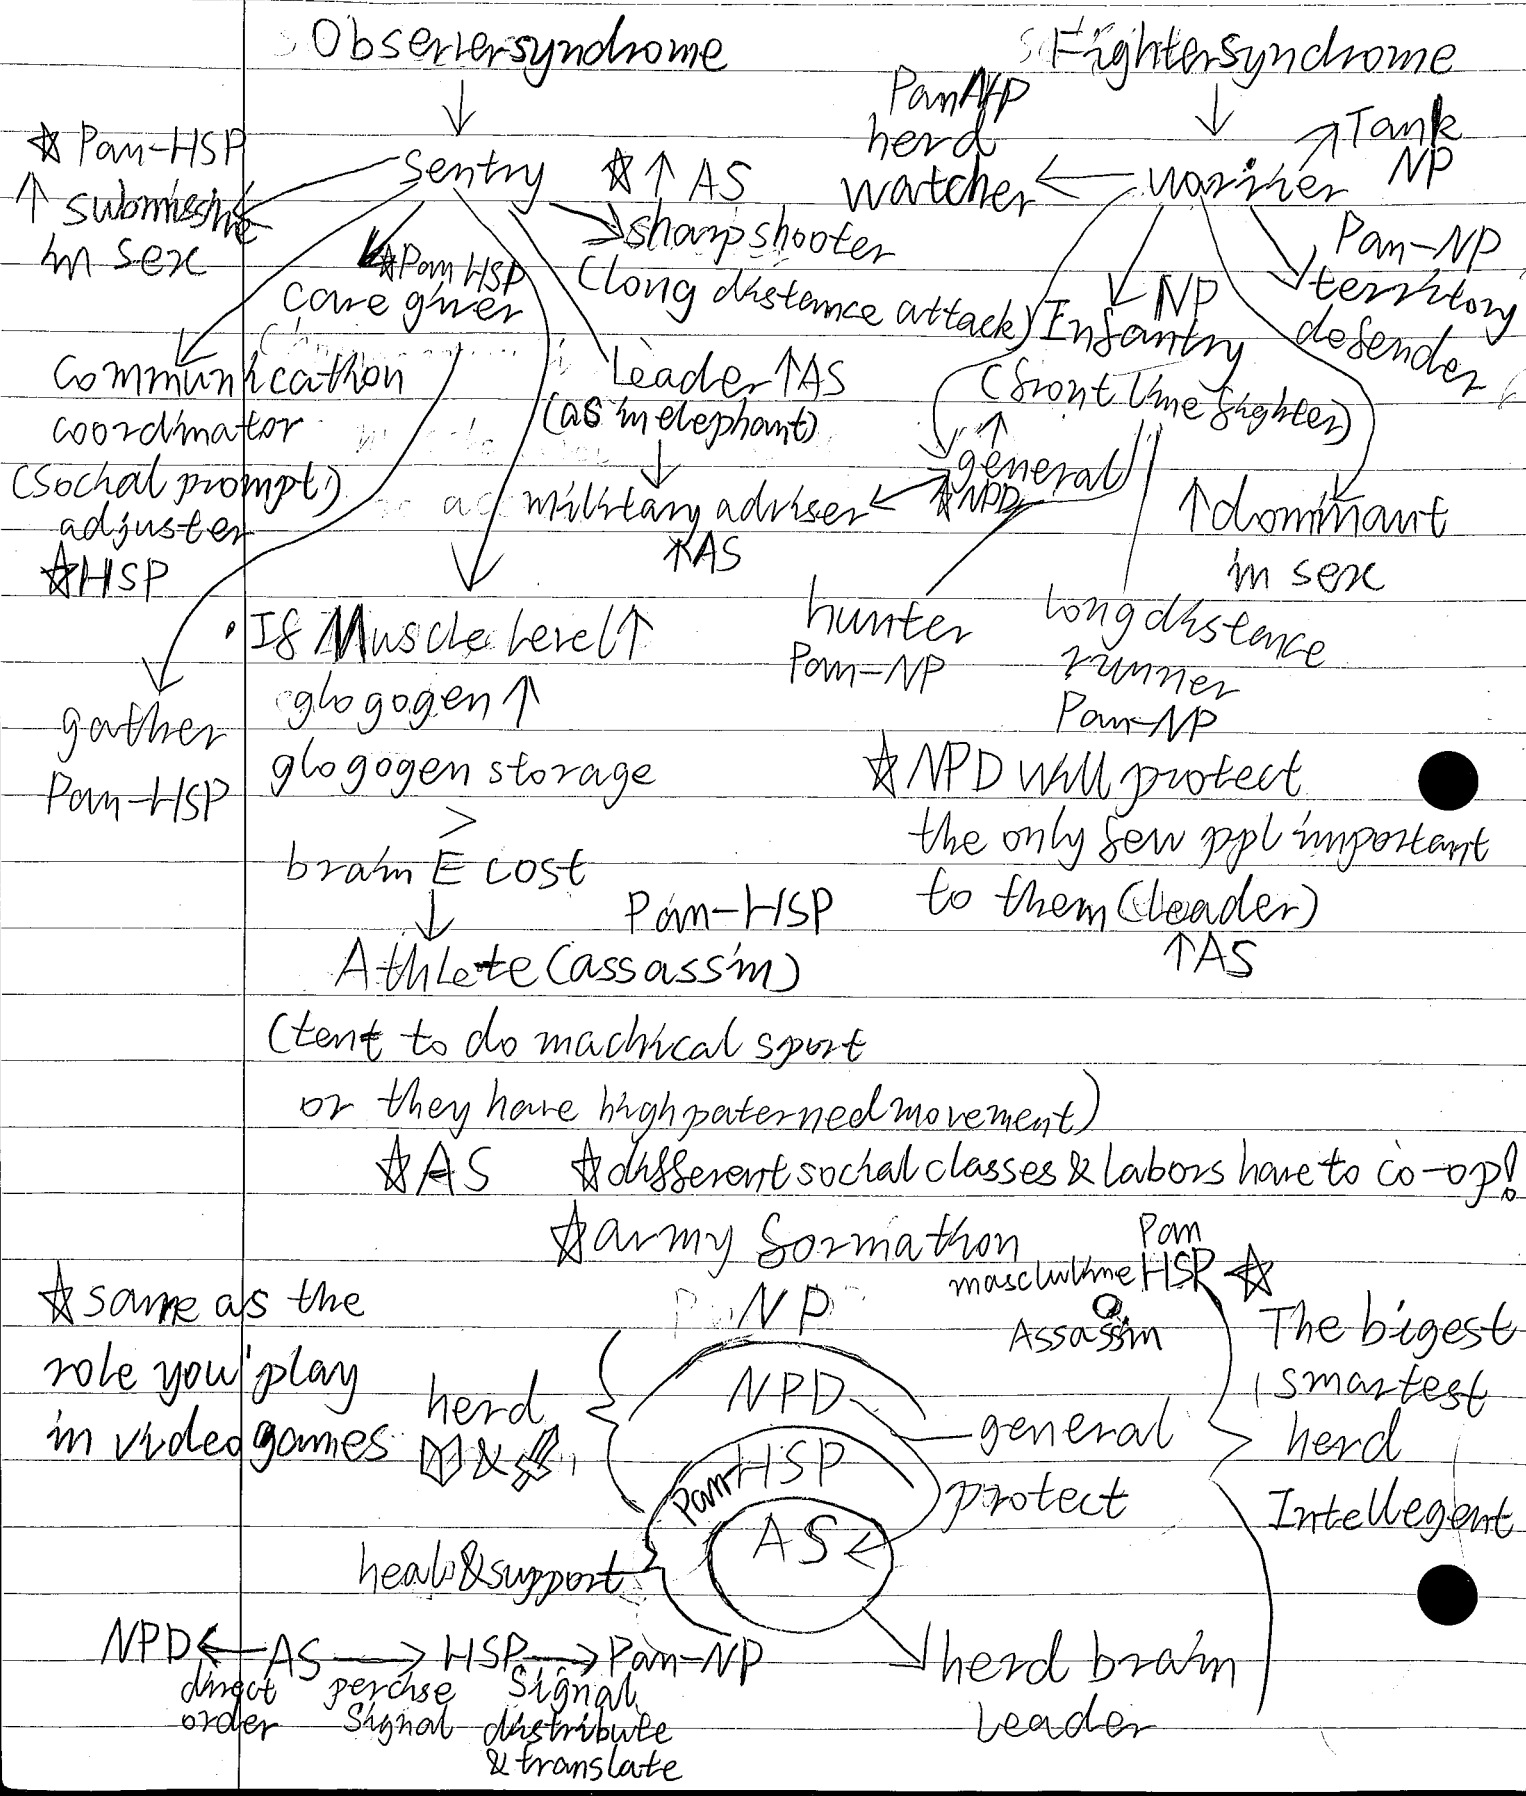

★ Friendship army group
 sum of close friends in group = 0
 equilibrium

★ Pheromone

observer syndrome → Indole

fighter syndrome → Decanoic acid

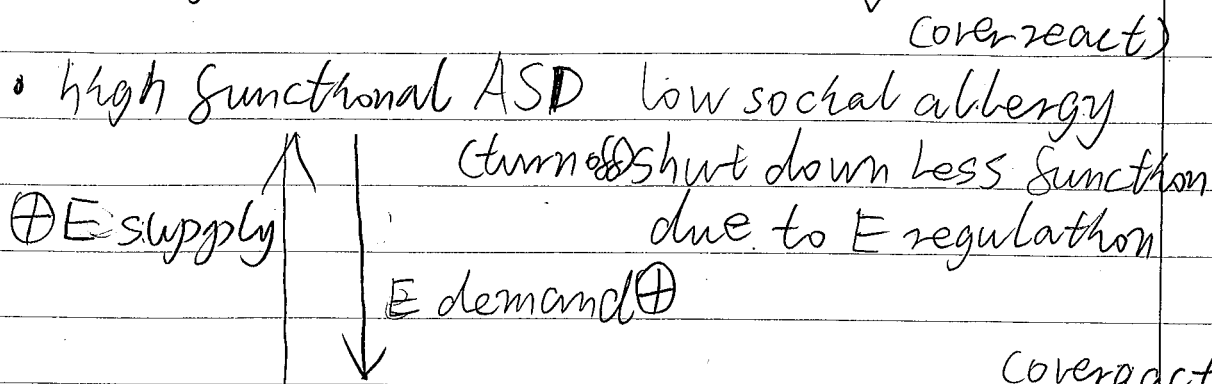

★ Social chess sub division

Relationship between ASD

(14)

- No Social allergy to familiar ppl = herd
- AS = H-HSP (natural stage of Observer Syndrome)
- Enough E to function normally,

low functional ASD → high social allergy

turn off shut down more function

cover react)

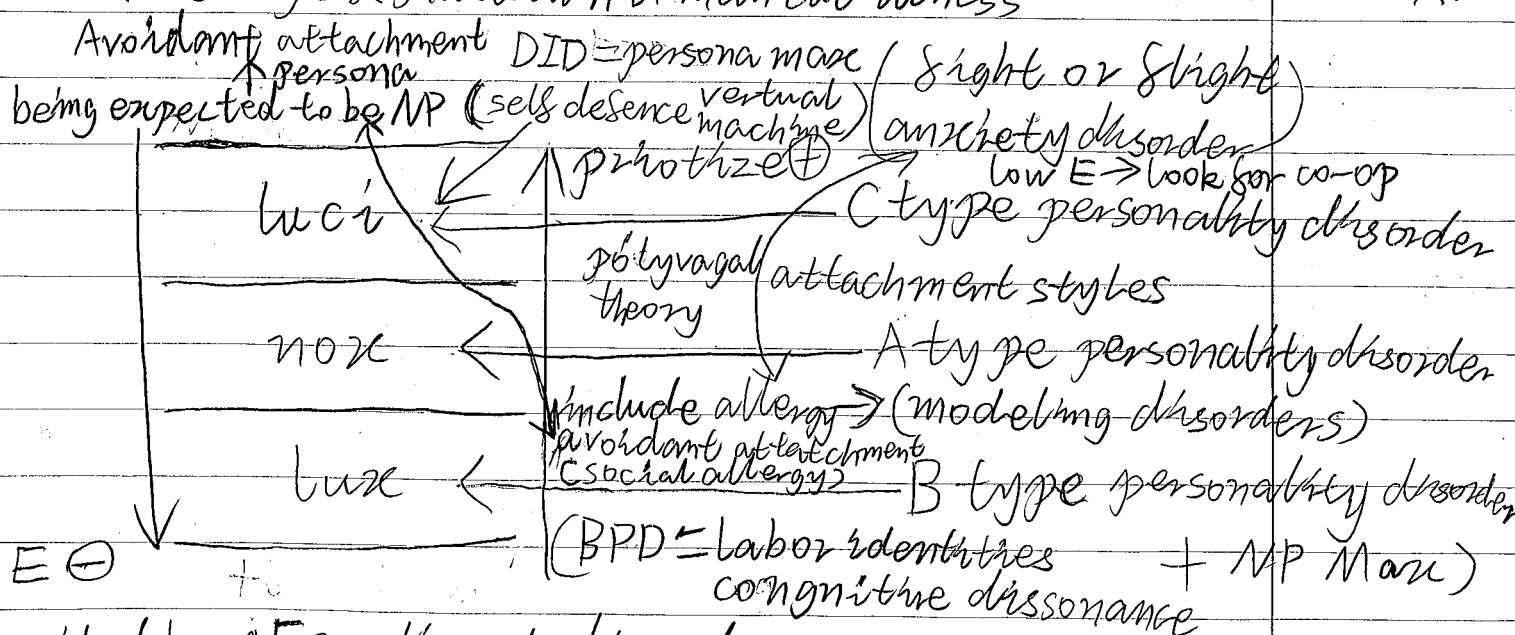

stress & depression due to E regulation

programs dealing with stress & E cost

just war makes humanity PTSD!

E stage & shutdown & "mental illness"

5 ~ 8

verled by E emotional disorders = E regulation disorders

herd conformity high S.C. & bipolar

operating resource occupied)

Partially learning disorders = operating resource distribution

The root of all: we forgot who we are!!!

partiality

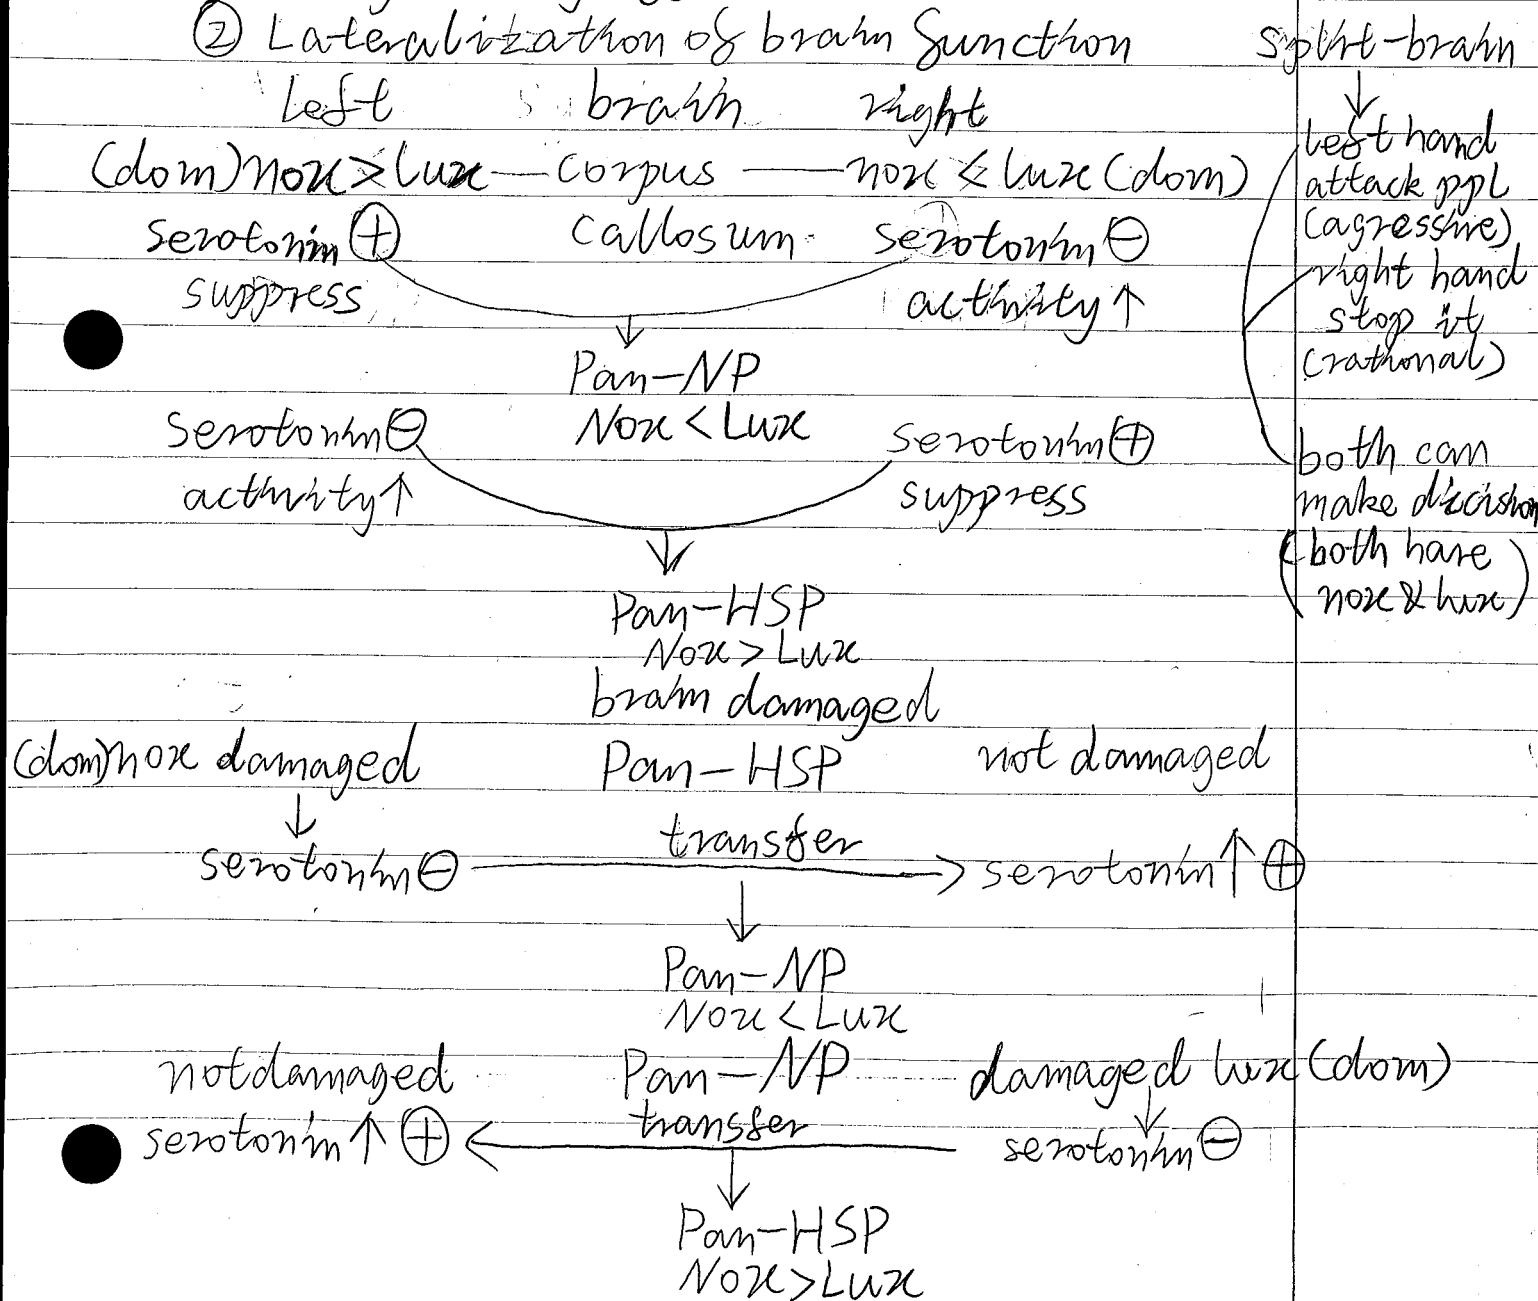

Modern human all have Identities cognitive dissonance

★ Cognitive ability

(15)

• Savant Syndrome

- ① Enough E to simulate certain function they are highly prioritized by the brain. These functions are activated by the first or most frequent appearance group of stimulations in early age. (imprinting effect)
- ② Lateralization of brain function

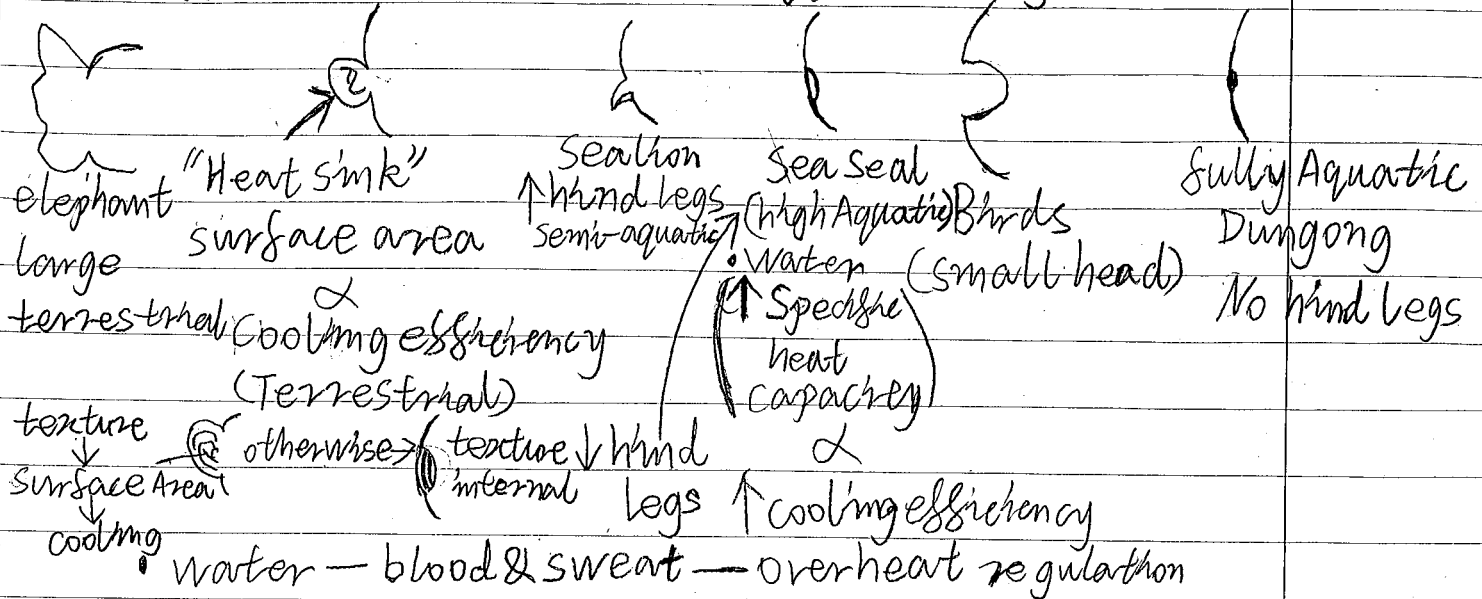

★ Psychological hardware of high S.C. animals

(16)

• Cooling system

★ Air - external ears - regular cooling

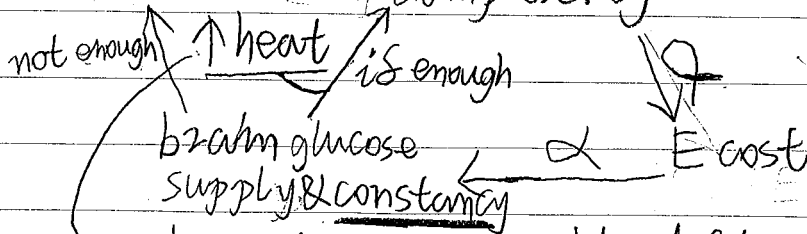

★ All high S.C. Animals are warm blood.

E too low → self-body desence (anxiety) (slight or slight)

depressed

shut down Psy status complexity

→ transfer heat → blood flow → sweat → Air

★ Ice silk fibre clothes recommended on body (close-fit)

• help immediately evaporate sweat → cooling

★ ear cover → winter

★ special earphone
